

# Norton Core™

## Secure WiFi Router

Your connected home could be putting your personal information at risk. Help protect your connected devices on your home network with a secure, high-performance Norton Core™ WiFi router.

### See How Norton Core Stacks Up

#### State-of-the-art Security—at Network Level

Norton Core defends at the network level—fending off cyber-threats before they can infiltrate your home and compromise your personal data.

#### Security Score

Keep your finger on the pulse of your network. Core monitors data from your connected home, identifies security issues, and sums it all up in a single, powerful number. If there's a problem, Core jumps in with timely insights and tools to get you back on track.

#### Best of Norton Security

Includes a one-year complimentary subscription to Norton Core Security Plus that helps protect your home network and an unlimited number of your connected devices, including computers and mobile devices against malware, viruses, and hackers. It also comes with parental control software for your kid's devices while at home or on-the-go.<sup>1</sup>

#### Ultimate WiFi Performance

You can stream your favorite movies in 4K, play online game and download any content simultaneously with its powerful dual-core processor and MU-MIMO technology that delivers maximum speeds of up to 2.5 gigabits per second.<sup>2</sup>

#### Smart Parental Controls

Internet time. Family time. Only you know the right balance. So we created a set of flexible, powerful tools for parents. Monitor and manage screen time by person, control time limits by device, and set content filters. You can even pause the entire network. And the app is about as easy to use as a light switch.

#### Mobile Network Control

Manage your home network, right from your phone. The app shows you exactly what devices are on your network at any given time, plus upload and download speeds. It even gives you the power to adjust WiFi settings and control bandwidth by device—no matter where you are.<sup>3</sup>

<sup>2</sup> Maximum wireless data rate is derived from IEEE standards 802.11 specifications. Actual data throughput and range may vary as a result of network conditions and environmental factors including volume of network traffic, building materials and construction, obstacles and interference. Other adverse conditions may also lower actual data throughput rate and wireless coverage.

<sup>3</sup> Requires a mobile data plan or Internet connection.
