FROST GUARD®

NOTE: the FrostGuard® is designed to cover the substantial viewing area of the windshield. Perimeter edges may not be covered.

For best results, apply over a dry windshield.

The FrostGuard® should not be used as a sunshade or in extremely hot weather.

! WARNING: Never operate the vehicle with the product installed on the windshield. It is only intended for parked vehicle use.

INSTALLATION INSTRUCTIONS

1. Place elastic loop over the driver's side mirror. Our FitFast™ technology ensures the best placement and most snug fit to your windshield, every time.
2. Unroll the FrostGuard® as you walk around the front of the vehicle. It may be necessary to slightly stretch the elastic loop as you walk in front of the vehicle to attach to the passenger's side mirror. The printed side should be facing out.
3. When you reach the passenger's side mirror, slide the corresponding elastic loop over the mirror.
4. Lightly tug on the FrostGuard® to center the unit on the windshield. Check and smooth the cover to make sure it is lying flat against the windshield.
5. Extend the wiper blade cover over windshield wipers for added protection.
6. To store the FrostGuard®, first fold in half, length wise. Align side edges together and fold. Tightly roll the FrostGuard® by its dowels toward the opposite side until all fabric has been wrapped. Holding the FrostGuard® in the middle, slide it into the quick-dry nylon sleeve.
