# The Paperless Ring Binder

Do you need to keep your work or personal documents neat and tidy? Are you fed up with spending hours looking for information? gDoc Binder is the ideal application to organize your digital files, combining the ease of use of a physical binder with all the convenience and efficiency offered by a software solution.

## Organize

Drag and drop or select any document from any location into your binder. Create a binder and split it down into tabbed sections. Create a library of binders on different topics and store them to Dropbox. As you add and reorder documents and tabs, the software automatically maintains the table of contents. You can create a binder from a Windows folder and automatically convert into tabs so that the table of contents mirrors the structure of your folder.

## Take Notes and Annotate

Create pdf annotations including text notes, highlight, underline, strikethrough, and hyperlinks. You can also fill in digital pdf forms.

## Search

Find key terms across the entire binder, the current tab, or the current document, regardless of where the document or data originates inside the binder files or within the operating system.

## Personalize

Choose the binder and tab colors. Create a cover page using any Windows application. Add names and descriptions to each of the tabs and choose what will be shown in the table of contents. Save binders as reusable templates.

## Share

You can share your binder, a tabbed section, or just a single document by email and you can link your library of binders to your favorite cloud storage device.

### Fend Off Viruses and Malware

#### **NEW High-performance scanning engine**—

We built our next-generation scanning engine to guard your PC from the latest viruses, Trojans, spyware, rootkits, and other threats, all without seriously compromising battery life or slowing your PC down.

#### **ENHANCED Safe searching and shopping**—

With color-coded icons next to every search result, including popular social networking sites, you'll know if the site you're about to visit is safe.

**ENHANCED Digital data message**—including the location of the blocked IP address and what makes the connection unsafe.

#### **NEW Home screen**—Got a touch-friendly device?

Our new home screen is built with your fingers in mind. And it still works great with a track pad or mouse, so navigating to common security tasks is a breeze—on any device.

#### **ENHANCED Security reports**—We've redesigned

the security report to bring you the information you need in visually interesting ways. The new report includes relevant images and links for an easier-to-understand snapshot of what's going on in the world of security.

**NEW Vulnerability scanner**—If your OS and programs are out of date, you could be vulnerable to threats. The new vulnerability scanner checks your PC for missing updates, and then recommends solutions to keep you safe.

#### **NEW Malicious ads and popup protection**—

Websites don't always have control over the ads they display. Sometimes, you might find a risky ad on a site you trust every day. McAfee automatically blocks suspect malicious ads to keep you protected.
