

PREPARATION

- 1 **Locate your home Wi-Fi router password. You will need it to connect your Guardzilla 360 to your Wi-Fi network.**
- 2 **Unpack the Guardzilla 360 camera. Remove the platform the 360 camera is sitting on by unscrewing the clear plastic screw on the bottom.**
- 3 **Download the Guardzilla app from the Apple App Store or Google Play store.**
- 4 **Launch the Guardzilla app on your phone.**

SETUP

This simple guide will help you set up your Guardzilla 360. Select **Sign Up** to begin the setup process. If you have a Guardzilla account select **Sign in to my account**.

1

Enter your mobile phone number, then press **Next >**.

Your smartphone should be in the same room as the camera during setup.

4

Review the **Terms of Service**, if desired. Press **I agree** to accept.

2

Choose a password for your Guardzilla account. Your password is case sensitive. Select **Sign Up** and your account will be registered.

5

Enter your email address, then press **Next >**.

NOTE: Your email address will be used to log into your Guardzilla account, retrieve your password and receive motion detection alerts.

3

Select the **Add camera** button.

6

Select the **360** camera from the list.

7

Enter your Wi-Fi network password. Remember: Passwords are case sensitive. Once finished, press **Next >**.

11

Plug your Guardzilla 360 device into a standard outlet.

IMPORTANT: For best results, follow these camera placement tips:

- Place your camera near the center of the room and avoid placing objects near the lens that will obstruct the room view and sensors.
- Locate your camera as close to your router as possible and avoid dense obstructions (e.g. fireplaces, thick walls) between the router and camera.

A light on the top of the camera will blink red for about 20 seconds. An audio message from the camera will announce “Guardzilla 360 is initialized” and the light will now flash blue. Your camera is ready for set up.

8

Review the Wi-Fi network and password you entered. If they are correct press **Confirm**. If not, press **Change** and update. Your camera will now connect to your phone and Wi-Fi network. You will see a green blinking light on the camera and hear a chime and “Connection is successful” when connection is achieved. The blinking green light will now become a solid light.

12

Name your camera, e.g., family room. Once finished, press **Next >**.

13

Locate your Wi-Fi network name and password, then press **Next >**.

NOTE: The Guardzilla 360 will use the home Wi-Fi network that your smartphone is connected to.

9

The **Congratulations** screen will appear... your setup is complete! Press **Next >** to go to the main app screen. See the **Guardzilla 360 Quickstart Guide** for usage tips. Enjoy your Guardzilla 360!

14

Your Guardzilla 360 will identify the home Wi-Fi network. Confirm that:

1. It is a 2.4GHz network; AND
2. Your smartphone is connected to the same Wi-Fi network displayed in the app. If not, connect your phone to this network.

Once finished, press **Next >**.
