

How to Set up the Blink Yard Sign

The Blink yard sign is a simple, effective way from deterring unwanted visitors. It's also easy to set up! This article will show you how to assemble your yard sign.

- The yard sign will include the following items:
 - One weatherproof sign
 - Two metal rods
 - A small bag containing 3 screws

With the metal rod that is slightly wider, line up the pre-drilled holes on the rod with the holes on the sign. You'll want the rod on the back side of the sign where it doesn't have printing.

Using a Philips head screwdriver, secure the sign to the rod with the two small screws that were included

Take the second rod and line the pre-drilled hole with the remaining hole on the other rod. Using the larger screw, fasten the rods together.

When you've completed the above steps, the sign should look like this.

You can now take the sign outside and stick it into the ground in your desired location.
